DUOTOUR HIGH CAPACITY DOUBLE-WINGED AUTOMATIC REVOLVING DOOR

Doutour is a double-wing revolving door that can be optionally combined with an automatic sliding door or a manual 90° opening door, and is also suitable for structures with high pedestrian traffic.

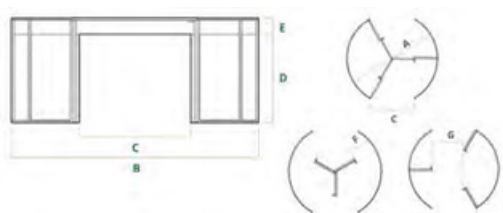

TWINTOUR SYNCHRONIZED MULTIPLE AUTOMATIC REVOLVING DOOR SYSTEMS

Based on the integration of two double-wing revolving doors, the Twintour model allows you to proceed straight through the revolving door as if walking in a corridor; It is an ideal solution for transit with luggage in places such as airports or train stations.

ORBIT TRISENS AUTOMATIC REVOLVING DOOR SYSTEMS

The Orbit TriSens model, designed with the flexibility to adapt to the environment and carrying the design lines of the future with its minimalist lines, offers a first-class entrance solution in buildings with heavy pedestrian traffic or where large objects need to be passed.

CLIMATIZATION

The process of adjusting the temperature, humidity, cleanliness and air movement of a closed environment according to human health and comfort is called air conditioning. We know that our automatic door models, which combine advanced technology with research on human behavior and building environment, will contribute to sustainable and healthy buildings. With smart sensors, adaptive operating modes and connectivity, we can ensure that every building makes a difference and contributes to the future of green buildings.
